(E) Applicant explained that Kostic et al. did not anticipate independent claims. A selected frequency in the step of "selecting a frequency from the plurality of frequencies" (claim 1) is from the frequency hopping pattern in the step of "receiving." The frequency hopping pattern in the step of "transmitting" is the same as in the step of "receiving." Neither is disclosed by Kostic et al.

(F) Examiner stated that the "plurality of frequencies" should be limited to less than all frequencies.

(G) Examiner agreed to withdraw the rejection in view of Kostic et al. Applicant agreed to limit the "plurality of frequencies."

Respectfully submitted,
